Active Shooter at UCLA, Los Angeles, Los Angeles County

On 06/01/16 at 1025 hours, the CSWC was notified of an active shooter situation at the UCLA campus. It has been confirmed that there were 2 fatalities as a result of a murder/suicide. The campus was on lockdown for several hours. The scene is secure and the investigation is ongoing. Cal OES Law Branch and Southern Region continue to monitor the situation.

California Department of Public Health Zika Virus Disease Update

The Medical and Health Coordination Center (MHCC) continues to be activated in response to the Zika Virus Disease (Zika) in order to aggregate and update information from a variety of sources and coordinate response activities across the California Department of Public Health (CDPH).

- CDPH centers and programs will assist in providing information related to their specific activities on a weekly basis. This information will be collected and included in a weekly Public Health and Medical Emergency Function (EF) 8 Situation Report released by the MHCC.
- The MHCC will manage requests for information from the public, healthcare facilities, and local health districts and ensure responses are timely and accurate during a time of evolving information.
- Zika is transmitted to people primarily through the bite of an infected *Aedes aegyptus* mosquito (also known as yellow fever mosquitoes) and *Aedes albopictus* mosquito (also known as Asian tiger mosquitoes), which are not native to California.
- Today, more than 60 countries have documented Zika virus transmission, with over 40 reporting their first outbreak within recent months. The most common symptoms of Zika are fever, rash, joint pain, and conjunctivitis (red eyes).
- The illness is usually mild with symptoms lasting for several days to a week after being bitten by an infected mosquito. People usually don't get sick enough to go to the hospital, and very rarely die of Zika. For this reason, many people might not realize they have been infected. However, Zika virus infection during pregnancy can cause a serious birth defect called microcephaly, as well as other severe fetal brain defects.
- Please see attached for full report

Sinkhole and Northbound I-5 Closure, Tracy, San Joaquin County

On 05/31/16, the California State Warning Center (CSWC) was advised of a sinkhole that appeared on Northbound I-5 south of Tracy, San Joaquin County.

- Per Caltrans HQ Comm. Center and CHP ENTAC: A detour has been established: Exit Eastbound Hwy 132 to Northbound Hwy 33 then back onto I-5.
- [Caltrans HQ Comm. Center advises that the Estimated Time of Reopening \(ETR\) is Friday, 06/03/16.](#)
- Per Cal OES Inland Duty Officer, the detour adds approximately 10 minutes of travel time.
- There are no requests for State assistance.
